

**Amendments to the Specification:**

After the title but before the first paragraph, please insert the following new paragraph:

**CROSS REFERENCE TO RELATED APPLICATIONS**

This application is a 371 filing of PCT International application no. PCT/IL2003/000911 filed November 3, 2003 and published in English as WO 04/041298 on May 21, 2004 which claims the priority of Israeli application no. 152609 filed November 3, 2002, the disclosures of which are hereby incorporated by reference in their entirety.

On a separate page, page 33, please insert the following abstract:

**LIPOSOMAL COMPOSITION COMPRISING HAPTOTACTIC PEPTIDES****ABSTRACT OF THE INVENTION**

The present invention relates to liposomal composition comprising peptides characterized in that they elicit cell attachment (haptotactic) responses and are internalized by cells; more particularly the compositions comprise cell attachment peptides derived from or homologous to specific portions of the carboxy termini of fibrinogen chains, designated herein as Haptides, capable of enhancing the uptake of liposomes by cells. The present invention further relates to pharmaceutical and cosmetic compositions comprising haptotactic-peptide liposomal compositions and uses of same.
